English

Urdu

Experience

● **Codsoft**
Jan 2024 - Feb 2024
Web Developer
As a Web developer at Codsoft, I was responsible for creating and maintaining website using various technologies such as JavaScript, HTML5, CSS3, and Bootstrap.
I collaborated with a team of developer of implement new features and functionalities, ensuring a seamless user experience. Additionally, I utilized Git for version control and worked on website updating and maintenance tasks.

Projects

● **Grocery Store Web Application**
I created a dynamic grocery store project using C#, ASP.NET, Bootstrap, HTML, CSS, and a SQL database. This hands-on endeavor seamlessly integrated front-end and back-end technologies, leveraging C# for functionality, ASP.NET for robust server-side processing, and Bootstrap, HTML, and CSS for an engaging user interface. Implementing a SQL database optimized data storage. This project showcases my versatile skill set and ability to create scalable and efficient web applications.

● **TODO List**
I designed and built a sleek Todo List application using JavaScript, Bootstrap, HTML, and CSS. This project demonstrates my ability to create functional and visually appealing web solutions.

● **Youtube Clone**
I crafted a YouTube Clone using HTML and CSS, showcasing my skills in web development. With a focus on user-friendly design and aesthetic appeal, this project highlights my ability to create engaging and functional web applications.

● **Scientific Calculator**
Designed a precise scientific calculator showcasing cos, sin, and tan functions using HTML, CSS, and JavaScript. Demonstrates proficiency in creating functional and user-friendly web applications.
